EDUCATION

Year	Degree	Institute	CGPA / Percentage
2023 – 2027	B.Tech, Computer Science and Engineering	VIT Bhopal University	8.10 CGPA
2022	CBSE (Class XII)	Shri Shankaracharya Vidyalaya, Bhilai	79%
2020	CBSE (Class X)	Shri Shankaracharya Vidyalaya, Bhilai	85.8%

PROJECTS

AI-Powered Skin and Oral Disease Triage System

[Nov 2025-Mar 2026]

Technologies: Python, PyTorch, CNNs, Image Preprocessing

- Curated and preprocessed a multi-class image dataset (HAM10000 skin-lesion images combined with an oral-disease image set, 10,000+ images total) for a CNN-based triage system designed to bring low-cost disease screening to rural healthcare settings.
- Cleaned, labeled, and organized image data across diagnostic categories to improve model training reliability, collaborating with a cross-functional team on dataset structuring.
- Prepared and delivered the project presentation for academic review, communicating dataset methodology, model design rationale, and clinical relevance to the evaluation panel.

Driver Drowsiness Detection System

[May 2026-Jul 2026]

Technologies: Python, TensorFlow, MobileNetV2, Media Pipe Face Mesh, OpenCV

- Built a real-time driver drowsiness detection system by combining a MobileNetV2 CNN classifier with MediaPipe Face Mesh landmark tracking to monitor eye and facial cues.
- Trained and validated the classification model, achieving 86% training accuracy and 77% validation accuracy on heldout data.
- Authored the full technical report and presentation for academic submission, documenting the model architecture, training pipeline, and evaluation results.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Tools & Platforms: MySQL, Git, GitHub

CERTIFICATIONS

- Applied Machine Learning in Python — Coursera
- Cloud Computing — NPTEL
- Introduction to Internet of Things — NPTEL
- Google IT Support — Google
